

# TUNGSTEN NETWORK MASTERMAP

Our Integrated Solution is a fully automated process that allows you to extract and send invoice data directly from your accounting system. Tungsten Network then processes it, and delivers it directly into your customers' AP systems.

For a quick and easy set-up, Tungsten Network provides you with pre-defined templates that will accelerate your implementation onto the network. Simply select from one of our nine industry standards, match your fields to the template and get transacting!

## How to get set-up?

Select the file format from the MasterMap list that you would like to use when sending the data from your accounting system to Tungsten Network.

Our implementation team will then provide you with your desired template file. Simply indicate which fields in your accounting system correspond to those in our template, and you're ready to go!

## Want to connect to more customers in future?

This is easy with our MasterMap solution. If you need to output additional data for new customers, simply link your accounting data to the appropriate fields in your chosen MasterMap template.

If you do not have the resources to provide Tungsten Network the information needed in our pre-defined format, our team of experts will help you create a custom map\*. Please get in touch with your Tungsten Network supplier enrolment specialist for more details.

\*Please note that for a custom set-up, prices will be increased by 50%. For our full price guide, [please click here](#).
